- › Enhance audience engagement with outbound dialing and advanced outreach campaign capabilities
- › Send out post-call surveys to measure satisfaction
- › Quickly and easily integrate with CRM and WFM systems
- › And much more...

UNIVERGE BLUE ENGAGE CONTACT CENTER CUSTOMER BENEFITS

BETTER PRODUCTIVITY

Give your employees the tools they need - whether they need to collaborate together, talk to a customer, or a little of both.

INSPIRING INTERACTIONS

Total customizability in call flow ensures callers reach the right employees at the right time, while exceptional QA features deliver greater results.

Skillsets - Skills-based routing means the employee most suitable to take the inquiry is reached.

Callbacks - After a period of time, queued callers can request a callback and the next available employee will get their request. The system will wait to ensure the employee is ready before dialing - meaning better-prepared employees and interactions.

Preferred Agent Routing - You can assign a certain employee to act as 'point' on complex cases; with Preferred Agent Routing, calls and chats will be routed to an employee of your choosing.

Auto-Attendant Studio - You can easily create custom auto-attendants and deploy advanced functions like variables, conditional logic, and much more. ENGAGE puts amazing power at your fingertips via an intuitive drag-and-drop visual interface. Plus, custom API integration delivers even greater functionality.

CUSTOMER-CENTRIC CHANNELS

ENGAGE rolls up voice, chat, and e-mail queues into a single, streamlined omni-channel experience.

Queues & Contact Center Agent - With ENGAGE, you can forget the idea of a 'queue' being only for voice calls. Powered by ENGAGE Agent Desktop software, voice, chat, and e-mail interactions are all seamlessly integrated.

UNIVERGE BLUE CONNECT + ENGAGE

Use one application to manage employee collaboration and customer voice interactions.

Agent Login - Choose to take customer calls within CONNECT. Log out when done and resume other collaborative work with other employees.

Advanced Call Management - Take queued customer calls and then call, chat, and meet with coworkers to quickly resolve requests.

Sync - Avoid getting other calls when working with customers. Let others see when employees are talking to customers.

IN-DEPTH INSIGHTS

Real-time insights get agents into context quickly, helping to deliver more informed responses that shorten times to resolution. Plus, deep historical reporting helps improve future interactions.

Customer Journey - The Customer Journey feature shows agents, right in their Agent Desktop view, the recent touch-points for a given caller so they're up to date on where the story stands, and how they can more immediately and effectively address the situation.

Dashboards and Live Monitoring - Our Dashboards help you monitor the platform in real-time, including wait times, service levels, and much more. Live Monitoring lets you tune into specific interactions - and even take control as needed.

Custom Reports - You can choose from hundreds of pre-built reports on call distribution, service level adherence, unanswered calls, post-call surveys, and so much more. Our Product specialists can also develop custom reports to best meet your unique needs.

OUTSTANDING ENGAGEMENT

Capture your customer's attention with notifications for reminders, promotions, and more.

Dynamic Notifications - Turn your contact center into an outreach powerhouse. From simple appointment reminders to multi-channel marketing campaigns, Dynamic Notifications dramatically extends a company's reach while still respecting customer preferences.
