

Why Grandstream's GXP2160 Enterprise IP Phone?

1 VIBRANT COLOR-SCREEN DISPLAY

Modernize your desktop experience with a display that looks just like your mobile

The GXP2160 offers a vibrant 4.3" full-color display that brings your desk phone experience into the 21st century. The full-color display offers enhanced usability and a visual experience similar to mobile phones. Interacting with your IP phone has never been as easy.

2 INTEGRATED BLUETOOTH

Ensure you always have access to your contacts/calendars; make/receive calls on multiple devices

The integrated Bluetooth in the GXP2160 allows users to sync their mobile phones contact book and calendar with the GXP2160 to ensure you always have access to your contacts/calendars; for use of Bluetooth headset to allow workers to move around their office or use their hands while still being able to answer calls; and to allow users to transfer calls to and from the GXP2160 to their mobile phones.

3 A POWERFUL DESKTOP IP PHONE WITH BROAD INTEROPERABILITY

The GXP2160 offers state-of-the-art telephony features that increase productivity

The GXP2160 is a powerful IP phone that is the ideal deskphone for all business users. Being a SIP device, it is interoperable with all major SIP providers to allow users to deploy the GXP2160 without worrying about compatibility. The phone offers access to up to 6 lines, 6 SIP accounts, a 4.3" vibrant color display, 5-way conferencing, HD audio, integrated Bluetooth, Electronic Hook Switch (EHS) support for Plantronics headsets, Gigabit network ports, state of the art encryption protection, and more.

4 QUICK/EASY ACCESS TO YOUR CONTACTS

24 BLF extension keys offer quick access to up to 24 contacts at the touch of a finger

The GXP2160 includes 24 dual-color BLF/extension keys to offer quick and easy access to up to 24 contacts at the touch of a finger, and monitoring of contacts extension status (if on the same PBX network). This makes the phone ideal for executives, receptionists, and other users who handle high call volumes.

5 INTEGRATE WITH THE UCM6100 SERIES FOR RAPID DEPLOYMENT AND ADDITIONAL FUNCTIONALITY

Setup and Provision GXP2160 in minutes with Zero Config

The GXP2160, as well as all Grandstream IP endpoints, can be quickly provisioned through the Zero Configuration feature on the UCM6100 series, which allows for setup of an entire Grandstream solution in just minutes. The UCM6100 series' Web UI allows for central and remote management of the entire solution. The UCM6100 series also offers the GXP2160 an extra set of features, such as 1-touch call recording, CDR, voicemail forwarding to email, access to LDAP phonebooks, and more.

6 ACHIEVE THE FASTEST POSSIBLE NETWORK SPEEDS

Dual Gigabit network ports offer quick connections and crystal-clear audio

Integrated dual Gigabit network ports on the GXP2160 allow the phone to achieve the fastest possible connection speeds available, up to 1000mb/second. This ensures that all calls and pages go through as quickly and as clearly as possible to allow the users to be as productive as possible.
